Data stored in database:

The screenshot displays the phpMyAdmin web interface. On the left, a sidebar shows the database structure with 'jobsportal' selected, and 'apply_data' highlighted under the 'New' section. The main panel shows the 'SQL' tab for the 'apply_data' table. A green status bar at the top indicates 'Showing rows 0 - 1 (2 total, Query took 0.0010 seconds.)'. Below this, the SQL query 'SELECT * FROM `apply_data`' is entered. A toolbar offers options like 'Profiling', 'Edit inline', 'Explain SQL', 'Create PHP code', and 'Refresh'. A second toolbar provides controls for 'Show all', 'Number of rows' (set to 25), 'Filter rows', and 'Sort by key'. The 'Options' section shows a table with columns 'id', 'name', 'apply', 'qual', and 'year'. The first row of data is visible: id 3, name Jack, apply web analyst, qual btech, year 2021. Below the table, there are buttons for 'Check all', 'With selected', 'Edit', 'Copy', 'Delete', and 'Export'. A third toolbar at the bottom of the table section includes 'Print', 'Copy to clipboard', 'Export', 'Display chart', and 'Create view'. The 'Query results operations' section contains a 'Bookmark this SQL query' button. Below this, there is a 'Label' input field, a checkbox for 'Let every user access this bookmark', and another 'Bookmark this SQL query' button.

Showing rows 0 - 1 (2 total, Query took 0.0010 seconds.)

SELECT * FROM `apply_data`

Profiling [Edit inline] [Explain SQL] [Create PHP code] [Refresh]
